B20 - Life Cycle Test Life Cycle

For Superior Performance

*Tested Internally Against Japanese Industrial Standards.

▶ Double Ring Design

Better bond between terminal and PP cover to avert acid seepage

▶ New Plates and Improved Electrolyte

Increased corrosion resistance and reduced water loss

▶ High-Torque Resistant Terminal

Sturdier battery terminal to oppose twisting during clamping

▶ Improved Container and Cell Design

Tight fitted element for higher robustness from vibration

▶ Improved Strap Design

Re-engineered strap design and IC weld to improve robustness under heavy road condition
